

[ BENEFITS ]

**Great search capacities**

This utility allows you to search for Items in Dynamics™ SL using multiple and partial search criteria in an easy to use interface. Results are displayed in an easy to view grid format with drill down and print capabilities.

**Find the information you need**

The AP Search Utility is a powerful tool for finding any information in the Dynamics™ SL AP module. With this utility, you can search by virtually any information that has been entered into the Dynamics™ SL System for the AP module.

**Put your information to work**

Your search can be further enhanced by the use of Operators. These Operators are the true power of the AP Search screen. You have six different Operators that can be used in each field. This gives you unlimited searching ability with as much or as little information as you have. The fields will change colors based on the Operator used in that field.
