

BENEFITS

Manage Journal Entries effectively

Easily reverse any journal entry in Dynamics SL General Ledger. JE Reverser simplifies the reversal process by eliminating the need to manually key in the reversing entry. Entries from any module can have their General Ledger entries reversed.

Put your information to work

The JE Reverser utility eliminates the time consuming process of keying in a reversing journal entry. You can quickly select the batch to reverse, enter the period to post and process the reversing entry. The system automatically enters the reversing journal information and places the resulting batch on hold. You can then release the batch or modify it.

Maintain security

Journal Entry Reverser module uses DynamicsStandard Security to limit access to viewers.

Integrate powerfully

JE Reverser allows selection of batches from any ledger including statistical and budget ledgers.

Journal Entry Reverser

Improve efficiency for your business by tracking, analyzing and reversing journal entries from within Dynamics SL.

Journal Entry Reverser creates reversing journal entries from General Ledger Journal Entry batches that have already been released and posted.

Reverse Journal Entries for multiple modules.
