

BENEFITS

Manage Periods more effectively

Periods to Post is useful for preventing the accidental posting of batches from any Dynamics SL module into the wrong periods.

Put your information to work

Periods to Post makes it easy to control which periods batches can be posted into for each Dynamics SL module.

Maintain security

Period to Post Lock module uses Dynamics Standard Security to limit access to viewers. Each Dynamics SL module can be set up independently and any user can be restricted from posting to non-allowed periods or allowed to post to any periods.

Customize powerfully

Customization Manager is required to use this product. The following Dynamics SL modules have customized screens provided for your use on the Product CD: Accounts Payable, Accounts Receivable, Allocator, Budget, Cash Manager, Flexible Billing, General Ledger, Inventory, Purchasing, Project Controller, and Time & Expense.

Additional screens can be customized by contacting Progressive System Solutions, Inc.
